Introduction

reputable company registered with the Patents and Companies Registration Agency (PACRA). The company was founded in the year 2006 and is wholly owned by indigenous Zambians. It is one of the most promising local automotive companies in the Republic of Zambia. With operations in the Copperbelt and Copperbelt Provinces, the company keeps on gaining more-and-more national character in the country. Distinguished for its dynamic growth, prosperity and stability, Fuelit Logistics Limited has been providing services to a wide range of customers since its foundation in 2006. The company offers and provides a wide range of automotive services including vehicle repairs, panel beating, spray painting, general motor vehicle servicing and other automotive services.

MANAGEMENT RATIONALE

To provide opportunities for the intellectual growth of all our employees, and through our joint efforts, contribute to the safety and advancement of society and humankind. Further, to ensure customer satisfaction, Fuelit Logistics Limited encourages “management by all employees,” and continuously enhancing our capability and power to achieve our targets more efficiently and effectively.

MISSION STATEMENT

“To Provide Modern Value for Money Services that Promote Best Practice in the Automotive Industry so as to achieve Economy, Efficiency, and Effectiveness in all our obligations”.

CORE VALUES

- Integrity • Efficiency • Accountability • Excellence

The Company shall apply a unique perspective of modern automotive engineering so as to drive lasting improvement in the country’s road safety.

SURVEY

A short survey conducted by One Stop Technical Services has revealed that 25% of the current and latest computerized models of vehicles on the Zambian roads, have broken down and are parked in homes, garages, and company premises, because there are no people with Appropriate skills to repair them. It has equally been observed that most lecturers in automotive colleges hardly have the necessary Technical skills and knowledge to meet the current challenges in the industry, leading to offloading more incompetent graduates on the job market. On the other hand, the carbon Tax concept and its relation to global warming and climate change is not fully understood by most law enforcers. Motor vehicle inspectors, standards managers and Emission controllers, leading to inefficient management of these units, hence the need to equip them with the appropriate knowledge for them to competently manage and coordinate the various units.

GOVERNMENTS’ REGULATIONS OF THE AUTOMOTIVE INDUSTRY

The ever changing tough laws and stringent measures taken by most governments in the developed world, such as the clean air act, the Energy Policy and Conservation Act, the Motor Vehicle Safety Act, to Curb pollution, Optimize fuel economy and Motor vehicle safety has led to automobile manufacturers to constantly develop new designs to meet the Law requirements.

Zambia and Africa as a whole are no exception to the effect of the on-going change in the Automotive Technology. The increasing complexity of the current vehicles on the market, calls for Zambia’s Auto-Technicians and the world at large, to be retrained on the job to keep pace with the Change and subsequently keep Zambia’s cars rolling to meet her Economic challenges. Hence the need to build a modern Institute to address these concerns.

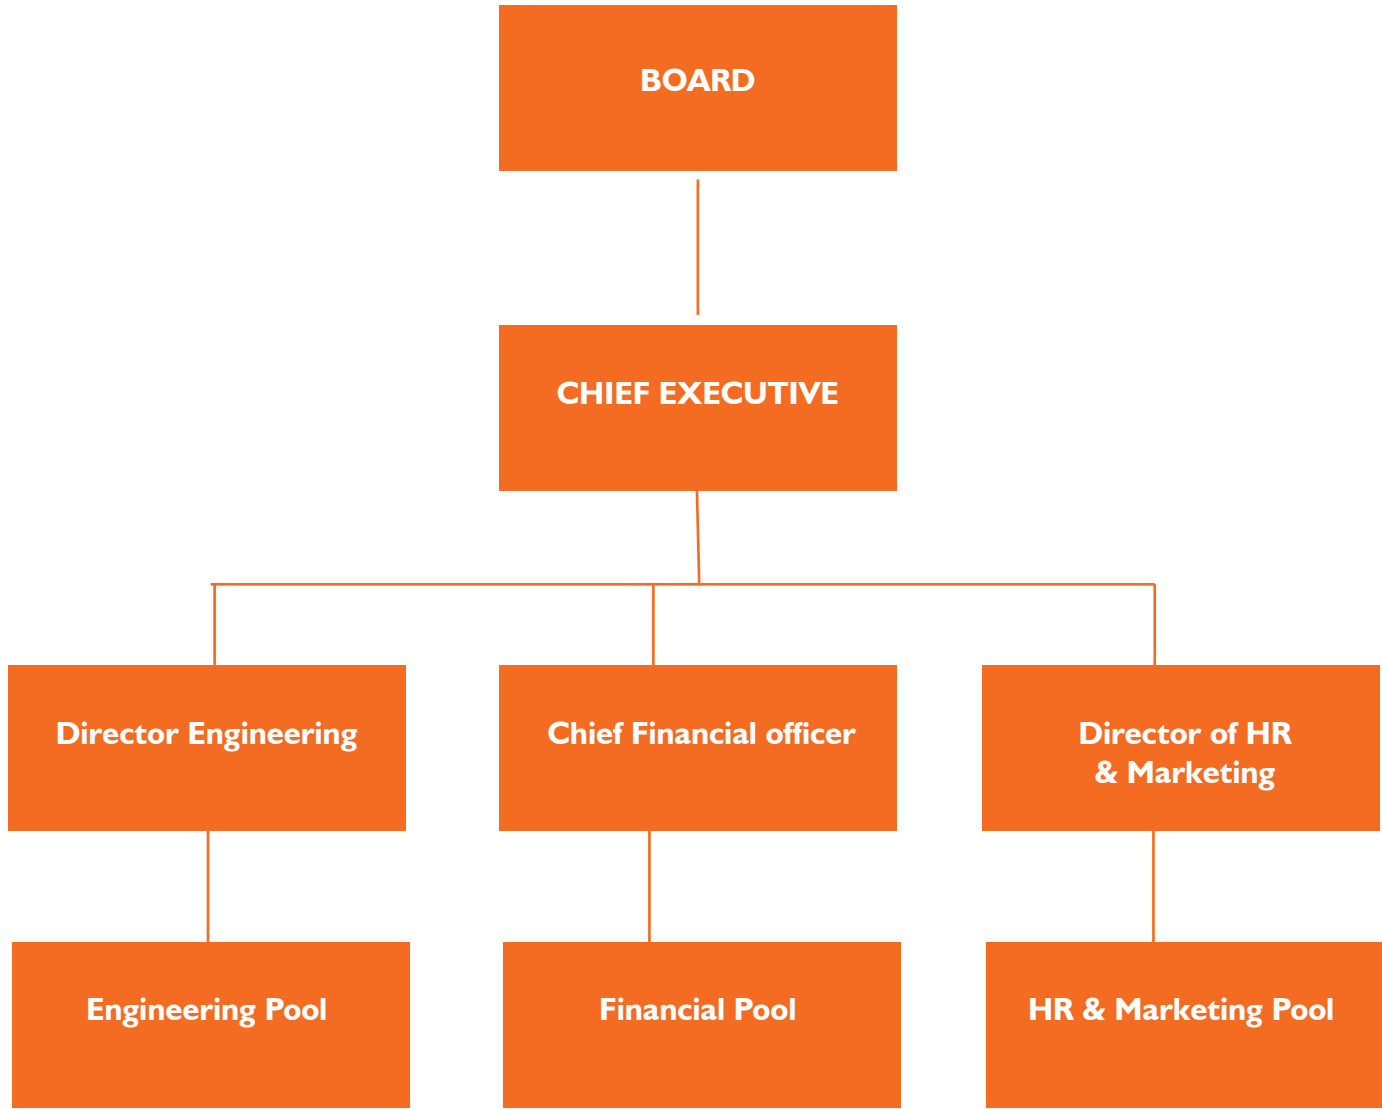

Technicians with hands-on skills in the latest developments in automotive diagnosis, service and repair. To run to workshop that is practical in approach, pertaining to the theory of operation for computer controlled components and systems. This entails troubles they might develop and possible causes of these troubles, symptoms of defective components, diagnosis and troubleshooting, examples of real life problems practical to real work situations.

INVESTMENT RETURNS

The benefits are enormous. A nation with competent auto-technicians would excel in Communication and delivery, fuel economy, Emission control, and automotive safety, and subsequently reduce the Nation Fuel Budget, the Pollution levels and the Number of Accidents. There will be more vehicles on the road leading to more economic activities.

MANAGEMENT

The company has a board that superintends over the company’s business in accordance with the requirements of good corporate governance. We have a lean senior management structure to provide both leadership and expertise as shown in the diagram below:

OUR SERVICES

We aspire to provide and deliver value to the customer with a focus on excellent quality, cost effectiveness and timeliness of service. HEALTH, SAFETY, ENVIRONMENT AND QUALITY

Fuelit Logistics is a firm believer in upholding health, safety and environmental standards. Our unwavering approach to high levels of safety standard is unquestionable. Fuelit Logistics commitment is to ensure that our work area is at all times in a safe environment, that we store all oil drained from service of vehicles for onward disposal in an environmentally acceptable manner. That all our employees tasked to work in our workshop have appropriate personal protective equipment.

We also believe in the adage "DO IT RIGHT FIRST TIME" and "IF NOT SAFE, 'DON'T DO IT" slogans.

Fuelit will thus and at all times uphold and operate in the strictest of safety environment.

Safety Policy And Health Management

In order to uphold the values of good corporate citizenship and seek to contribute to the wider economic, social and environmental well-being of our country Zambia. We believe it's our responsibility to take into account everything as regards the quality of work, working conditions, employee's age, gender, working skills and other conditions that are regarded reasonably necessary in order to protect the employee from exposure to accidents or risks to his or her health.

- FUELIT is committed to achievement of a high standard in safety matter with proper attention to prevention of accidents to personnel, and environment, FUELIT recognizes that motivation is a prime requirement for the high standard, to be achieved by active involvement of the management.

FUELIT supports this major commitment by providing material and manpower resources in an effective fashion.

- FUELIT regards compliance with relevant legislation as the principal requirement, but will exceed this requirement when necessary.
- FUELIT regards prevention of accidents to personnel, the environment and the facility to be a major responsibility of time management.

Each section has prime responsibility for its own safety program, and implements this within the context of the over facility program.

Line management responsibility is supplemented by the responsibility of each employee to help establish and maintain safe working procedure.

- Training is provided so that all employees understand their safety responsibilities and are enabled to fulfil them.

An effective safety program requires a free flow information. FUELIT encourages this via the normal line contact, committees, safety meeting and contacts with safety. Delegate to make maximum use of the experience and suggestions of all employees.

To keep staff abreast with the latest developments, this will be done every month by the station or section heads.

- FUELIT will investigate accidents, and serious incidents in order to identify any shortcomings in current safety practices.

- FUELIT requires each facility and each section to set itself annual safety goals should be numerical wherever possible.

- FUELIT recognizes that specialist assistance is necessary to enable sections fulfil their safety responsibilities. It therefore provides a safety organization.

The safety organization is also required to exert a monitoring role on the department facilitate safety programs to assist in detection of areas where improvement may be necessary and to help implement them.

- FUELIT requires periodic audits in order to ensure a continuing high standard of safety.

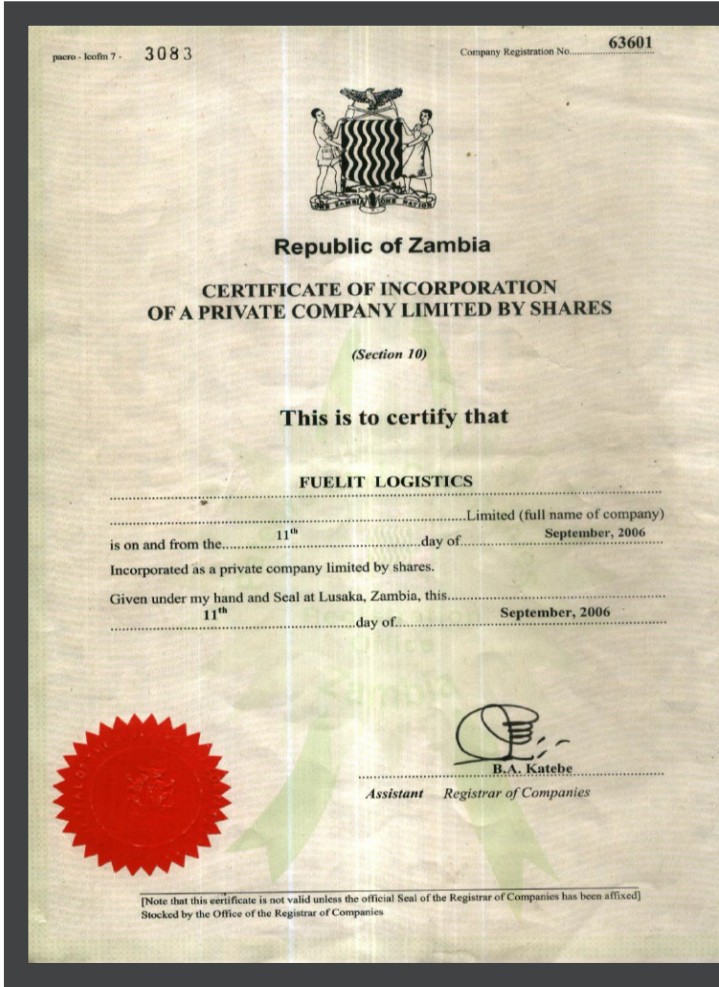

Functions And Duties Of Safety Section

- Identification of potential sources of danger to persons and property
- Investigation of accidents, including fires at construction sites and dangerous occurrences.
- Coordinate procedures to protect personnel.

Quality Assurance

The company upholds the policy of providing the service in exactly the right way the first time. This is organized through the basic idea that Quality is everybody’s number one responsibility.

This is to say, in our service delivery we endeavor to make available physical facilities, equipment and personnel that enables the company to meet the high quality standards requirements of our motto. We have the ability to perform the desired service reliably, accurately and consistently. We believe our knowledge, courtesy and ability to convey trust and confidence is the reason we continue to do business in the country.
